PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience supporting system, troubleshooting production issues, and maintaining operational uptime. Skilled in automation scripting (Python, PHP) with interest in tools like n8n, Zapier, Make, structured QA/testing, and technical documentation, with a strong analytical foundation from machine learning and full-stack development. Comfortable in cross-functional, culturally diverse teams with communication, teamwork, problem-solving.

TECHNICAL SKILLS

- **Infrastructure & Operations:** System & Network Infrastructure Support, Infrastructure Monitoring & Troubleshooting, Production/Operational Support, Virtual Machines (VM), Uptime & Stability Assurance
- **Web Development:** React, RESTful APIs, PHP/MySQL, Responsive Web Design, Tailwind CSS, HTML/CSS
- **Scripting & Automation:** Python, PHP, JavaScript, Workflow Automation, Test Automation
- **Databases & Web:** MySQL, Query Optimization, CRUD Operations, React, RESTful APIs, Responsive Web Design
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Power BI, Microsoft Office, Data Science Libraries
- **Methods & Analysis:** Agile Development, Code Review, Version Control, Technical Documentation, Data Analysis, Problem-Solving

EXPERIENCE

TeamSpan Asia Inc. — Information Technology Intern

Feb 2026 – Apr 2026

- Supported administration and maintenance of system and network infrastructure including configuration, device setup, debugging, and troubleshooting to sustain uptime and operational stability, contributing to end-to-end IT support processes.
- Assisted with infrastructure monitoring, incident troubleshooting, and production support, quality assurance, helping identify and respond to unexpected operational issues before escalation, performed incident management and root cause analysis to minimize downtime.
- Designed and developed a full-stack PHP/MySQL web application with CRUD functionality and automated email notifications to streamline internal business operations.
- Applied AI-assisted development and automation scripting to optimize application architecture, database schema design, and workflow automation, reducing manual processing of internal data.
- Validated CRUD workflows, database integrity, and automated email functionality through structured QA testing, applying an analytical, process-driven approach to operational reliability.

PROJECTS

Phishing Detection System

Jan 2025 – May 2026

Python, Machine Learning, NumPy, Pandas, Scikit-learn — Thesis Project

- Implemented ensemble learning algorithms combining multiple classifiers, improving detection accuracy by 25% versus single-model approaches through rigorous testing, debugging, and documentation.
- Conducted structured model evaluations using test cases, unit testing, and accuracy/precision/recall/F1 metrics to optimize reliability and reduce false positives an analytical, metrics-driven troubleshooting, also approach ETL Development – Design, build, test, and evolve ETL pipelines using Python and Jupyter notebooks.
- Produced technical documentation covering testing methodology, system architecture, and evaluation results for academic advisors and stakeholders.

PokeDex Explorer

Nov 2025 – Present

React, JavaScript, RESTful API, Tailwind CSS — Personal Project

- Integrated RESTful API services to fetch and display data for 1,000+ entities, implementing error handling and debugging for network failures and edge cases.
- Engineered an advanced filtering system with 8+ categories and debounced search, reducing API calls by 70% through performance optimization.
- Maintained the codebase using Git/GitHub version control, following consistent code review and documentation practices.

EDUCATION

Pamantasan ng Lungsod ng Muntinlupa

Aug 2022 – July 2026

Bachelor of Science in Computer Science — Best Thesis Awardee | Dean's Lister

- Relevant coursework: Software Engineering, Machine Learning, Artificial Intelligence, Database Management Systems, Operating Systems, Data Structures and Algorithms, Software Development and Web Technologies, Project Management and Team Collaboration.
